pM-K02 | Blood Pressure Monitor - Automatic

Real Fuzzy Technology determines ideal cuff pressure based on one's systolic blood pressure and arm size. Users no longer need to pre-set the inflation level before measurement. The "Movement Detector" helps reminding the user to remain still and is indicating any body movement during measurement. The specified icon appears once a "body movement" has been detected during and after each measurement.

1. Real Fuzzy Technology
2. Movement detector
3. Hypertension risk indicator
4. Irregular Heartbeat Detector (IHB)
5. Average of last 3 readings
6. 90 memories
7. One-touch automatic operation
8. Latex-free patented universal cone cuff
